- Strong belief in the importance of collective intelligence and motivation for team success in achieving shared goals.

Technical Skills

- Java
- JavaScript
- Python

- HTML/CSS
- NextJS
- SQL/NoSQL

- AWS
- Terraform
- Git

Project

Back-End Developer | How To Make Ramen | Link   Aug 2023

- Based on hypothetical client requirements, implemented a Java program using OOP principles to simulate a robot cooking ramen, emphasizing code reusability and scalability.

Full Stack Developer | Cloud Resume Challenge | Link   June - Aug 2023

- Developed a static website resume with Next.js, Tailwind CSS, and AWS services (S3, CloudFront, Lambda with DynamoDB integration).
- Established a CI/CD pipeline via GitHub Action, including end-to-end testing using Cypress.

Full Stack Developer | Interactive Story Platform | Link   Apr - May 2023

- Developed a community platform that connects writers and readers, enabling them to create unique stories with the help of the OpenAI API.
- As a member of 4, utilized Next JS to create API endpoints, and used Tailwind CSS to design the user interface and layout of the web application.

Full Stack Developer | Quiz Web Apps | Link   Jan - Apr 2023

- Led a 3-member team in developing a trivia quiz game that educates users on pet care during extreme weather events.
- Championed the full development cycle, from designing the database structure to writing code in JS and Node JS to create server-side logic such as calculating score.

Education

AWS Solutions Architect Associate	In Progress
AWS Certified Cloud Practitioner | Link	Jun 2023
Microsoft Certified Azure Fundamentals | Link	Jun 2023
Computer Systems Technology Diploma (GPA: 91%) **British Columbia Institute of Technology**	Jan 2023 - Present
Bachelor's degree in Economics **University of Washington in Seattle**	Sep 2004 - Aug 2010

IT Consulting Experience

Book Publisher, Operations Manager | JoEunSaengGak   Jul 2015 - Oct 2022

- Led a digital transformation team to renovate the outdated website and migrate 20 years of data from physical servers to Amazon cloud servers.

Senior Associate | PriceWaterhouseCoopers   Jun 2014 - Jun 2015

Project: SK Hynix Resource Management Project
- Conducted in-depth interviews with the R&D department of the world's second-largest memory chip maker to design the foundation process map of a time-tracking module for managing and tracking individual contributions.

Associate | Accenture PLC   Oct 2010 - Mar 2014

Project | KT, SAP ERP(Enterprise Resource Planning) System Implementation
- As a member of the Project Management Office, wrote a daily progress report, managed the scheduling of integration tests, and participated in training power users for their quick adaptation.

Project | Samsung Electronics, Contract Life-cycle Management
- Conducted assessment of the internal process and rules of more than 30,000 contracts and established an optimized CLM framework in collaboration with the internal legal team.

Project | SIMTEC, Procurement Optimization Model Implementation
- Created an Excel-based automation tool to calculate a safety stock level, temporarily replacing the client's legacy system.
